Celio Viana da Silva Junior

Web Development Student

Fortaleza, Brazil

cl.juniorr@gmail.com

+55 85 99675 8804

After graduate as Bachalor in Gastronomy and work 6 years in the industry, in 2021 I decided to switch career and started to study programming. I first learn the basics of web development with algorithms, html, css and javascript and, on may/2021, I started my technical degree in "Web Development", where I had contact with other languages as JAVA, PHP, SQL and more. Now I focus my study about JavaScript frameworks as Vue.js and React, and back end technology as Ruby.

Willing to relocate: Anywhere

Personal Details

Highest Level of Education: Bachelor's
Industry: Food Preparation & Service

Work Experience

Techno
Project
Project repository: https://github.com/celiovjunior/techno
SPA e-commerce website built with Vue. In this project, I could learn more how to use the framework for a better produtivity and code organization.

Scheduling System
Project
Project repository: https://github.com/celiovjunior/uece-projeto-buffet.
Website built with HTML, CSS and vanilla JavaScript for a scheduling system, using Node.js and SQLite to connect with database.
